

# MAHIMA MURALIDHAR KULKARNI

+91-7483065137|mahimakulkarni1308@gmail.com|linkedin.com/in/mahimamuralidharkulkarni|Bengaluru, India

Final-year B.E. ECE student (CGPA 8.0) from Atria Institute of Technology, Bengaluru, seeking opportunities in Data Analytics, IT,devOps or Operations roles where I can contribute through my skills in Python, SQL, and data-driven problem solving. Equipped with hands-on experience in Python, Machine Learning, Data Analytics, and IoT systems through academic projects and an AI with Cloud Computing internship. Currently pursuing IBM Data Analytics Professional Certificate. Demonstrated leadership through 4 consecutive IEEE chapter positions.

| Degree                | Institution                                                | Year      | Score     |
|-----------------------|------------------------------------------------------------|-----------|-----------|
| B.E (ECE)             | Atria Institute of Technology, VTU, Bengaluru              | 2022–2026 | CGPA: 8.0 |
| Pre-University (PCMB) | Maharani Lakshmi Ammanni College, Bengaluru                | 2020–2022 | 83%       |
| SSLC                  | Gajanan Rao Bhatkande English Medium High School, Belagavi | 2020      | 78.56%    |

## INTERNSHIP

### AI with Cloud Computing | SuprMentr | IN PROGRESS

- Worked on AI model concepts and cloud computing workflows using Python-based tools.
- Applied data preprocessing, feature engineering, and visualization techniques relevant to ML pipelines.
- Gained exposure to cloud deployment concepts, data pipelines, and scalable system design.

## PROJECTS

### JnanaSetu

- Developing JnanaSetu, an e-learning platform to deliver courses, live sessions, and assessments with real-time user progress tracking.
- Implemented admin dashboard, authentication system, and interactive features like quizzes and downloadable resources, ensuring seamless user experience. Tools: React, Node.js, Antigravity

### IoT-Enabled Dynamic Wireless Charging for EV with Solar Integration

- Designed a smart prototype enabling wireless EV charging in motion using inductive power transfer technology.
- Integrated IoT sensors for real-time data monitoring and capture, achieving up to 80% efficiency. Tools: Python, Arduino IDE, MATLAB.

### Footstep Power Generation Using Piezoelectric Sensor

- Built a renewable energy harvesting system converting mechanical footstep energy to electrical energy using piezoelectric sensors. Generated 3V for every 50 steps via IoT sensor monitoring, demonstrating viable small-scale energy harvesting.
- Tools: C, Embedded C, Arduino IDE.

## TECHNICAL SKILLS

| Category              | Skills                                                                                          |
|-----------------------|-------------------------------------------------------------------------------------------------|
| Programming Languages | Python, C, C++, Verilog, Unix Shell Script                                                      |
| ML & Data Analytics   | Machine Learning (KNN, Linear Regression, Naive Bayes, K-Means, Decision Trees), pandas, NumPy, |
| Tools & Platforms     | Matplotlib,Seaborn, SQL, Power BI, Excel                                                        |
| Cloud / DevOps        | MATLAB, Simulink, Arduino IDE, Cadence, Xilinx, Jupyter Notebook, MS Office,AntiGravity         |
| Soft Skills           | AWS (basics), Cloud Computing concepts, Data Pipelines                                          |
|                       | Technical Documentation, Presentations, Cross-team Collaboration, Problem Solving               |

## CERTIFICATION

| Certification                       | Platform       |
|-------------------------------------|----------------|
| IBM Data Analytics Professional     | Coursera       |
| Certificate Python for Data Science | Udemy          |
| C Programming Basics                | Simplilearn    |
| Introduction to VLSI                | Simplilearn    |
| Full stack web development using AI | AZ career link |

## LEADERSHIP AND EXTERNAL ACTIVITIES

| Role               | Chapter      | Year |
|--------------------|--------------|------|
| VTs Chapter Chair  | IEEE AIT VTs | 2025 |
| ITS MDC Chair      | IEEE AIT ITS | 2024 |
| RAS Treasurer      | IEEE AIT RAS | 2023 |
| ITS Publicity Lead | IEEE AIT ITS | 2023 |
